

# Our Solar System

# Solar System Song

There are eight planets in our solar system and we all revolve around the Sun  
Join us to learn about the different planets, sing along and have some fun

My name is Mercury  
I'm the second hottest planet and the closest one to the sun  
A year on my surface is 88 days  
I'm the smallest but I'm lots of fun

My name is Venus  
I'm the hottest planet but the second planet from the sun  
I'm the brightest planet in our solar system  
And I'm too hot for any one

My name is Earth  
I'm the planet you live on and the third Planet from the sun  
I'm the only planet with organic life  
So take care of me because we're all one

I am the Moon and I belong to your Earth  
You can see me sometimes in the day but mainly at night  
I have lots of craters and rocks  
I might hide behind a cloud or be full and bright

My name is Mars  
I am red in colour and I'm the fourth planet from the sun  
I have the highest mountain in our solar system  
A volcano named Olympus Mons

My name is Jupiter I am covered in clouds  
I'm the fifth planet from the sun  
My giant red spot is a raging storm  
As for size I'm the biggest one

My name is Saturn I am brown in colour  
I'm the sixth planet from the sun  
My outer rings are extremely thin  
They're made of dust and icy chunks

My names Uranus I am blue in colour  
I'm the seventh planet from the sun  
Humans have named me the icy planet  
Because I am the coldest one

My name is Neptune I am blue in color  
I'm the eighth planet from the sun  
I have too many storms in my atmosphere  
And I'm the furthest planet from the sun
